Comments

Team Coordination : The team's coordination was very good right from the start of the project. There was enough communication and coordination to achieve the sprint goals and team delivered great insights during the review

Achieving the goals : The team completed all the objectives listed in the sprint goals. Work was evenly distributed between the members.

Demo : The demo was carried out by the scrum master and had great menu in the client side. WIth little assistance, the demo was clear and precise. Enough directions were provided for all the features in the demo. Great work.

Code Quality : Get rid of the code smells and duplication of code blocks during the next sprint.

Testing : 82% coverage has been achieved with enough unit tests and documentation.

Overall, great work.
